The state coordinates online career guidance programs that will help you explore occupations, discover your personal likes and dislikes, and evaluate your skills and experiences. Each of the resources are provided free of charge to Florida citizens through this website. So, whether you are a high school student, college student, or even a professional considering changing careers, these programs can help! In addition, there are links to the career pages at Florida colleges and universities and the Career Portfolio - an interactive tool that allows you to store resumes, transcripts, and examples of your work, record educational and other skills and experiences, and maintain a list of your academic and work references, all in one online presentation to share with potential employers and graduate schools. To access the Career Planning Link, go to www.bridges.com.
