Welcome

Dear Daytona State College Student,

We are very pleased you have expressed interest in joining us for the Insight Adventure to Salinas de Nahualapa, Nicaragua. This study abroad program is open to all Daytona State students and you do not need to be enrolled in the College of Education.

Please read the entire information packet before submitting your application.

Included you will find documents required by Daytona State College and our partners in the field. Please complete these documents by typing your answers in the application. Print the application (pages 10-19) and sign where indicated. Return your application in hard-copy form to Dr. May at your earliest convenience. Your application will then be reviewed. Overview of Nicaragua Insight Adventure Project

The mission of Teaching Beyond Borders (TBB) is to teach DSC students beyond the conventional classroom by giving them meaningful service-learning experiences abroad. The Nicaragua Insight Adventure is part of an annual service-learning in education course offered each Summer term. It is the intention of this program to create recurring service-learning excursions to Nicaragua in which DSC students and faculty implement a project to support and strengthen community development. After the trip to Nicaragua, students will create presentations to communicate their experiences to stakeholders and sponsors and share the current needs that could be addressed the following year.

DSC students will benefit by being immersed in the language (Spanish) and culture of the Salinas de Nahualapa community, located near the west coast Rivas region of Nicaragua. Students will gain insight by seeking to understand the challenges faced by the indigenous people and share their insights by developing and implementing a project to serve the community.

Teaching Beyond Borders has partnered with The Fundación Aprender (Learning Foundation), which is a non-profit organization committed to providing educational opportunities for the youth in rural Nicaragua (<http://www.aprendernicaragua.org/whoweare.html>). The leaders of the foundation, James Womack and Gabriela Prado, have worked over 15 years to build strong connections and relationships within the community. Because of these well-established relationships, DSC students will have a myriad of choices for community projects and insight excursions.

DSC students will spend the first four weeks of the SAP in the classroom at Daytona State College learning conversational Spanish, discussing the community asset evaluation conducted in the region, and designing a project to implement in conjunction with The Fundación Aprender staff. DSC students will then choose an area of focus and work in small groups to design projects to meet the needs identified by the community and Fundación Aprender staff. DSC students will also be instructed in the basics of how to teach English language learners and develop mini-lessons and activities they can implement in the region. DSC students will also prepare during these introductory weeks by learning the cultural norms and general characteristics of the region and inhabitants, and relevant historical factors.

Then students will travel to Nicaragua and spend approximately seven days in Salinas de Nahualapa. Once DSC students are in Salinas, part of each day will be devoted to implementing their projects and interacting with the residents of the local indigenous community. The other half of the day structured excursions will be conducted (as time allows) because it is important for the DSC students to see many diverse aspects of the Nicaraguan culture and extraordinary ecosystem. For instance, students may have an opportunity to go turtle watching, visit local farms, tour the Mombacho Volcano, and Colonial City Granada, and participate in Zipline adventures, ocean boat trips, and remote beach picnics.

In the final week of the SAP, DSC students will return to the classroom for debriefing and finalizing their multimedia projects. These multimedia projects will be designed to communicate their personal experiences and educational growth during the service-learning project and will be presented to stakeholders, sponsors, and the greater DSC community during a culminating symposium.

The experience of study abroad travel, in general, always has an effect on students as they are able to broaden their viewpoint by seeing another part of their world. However, being able to contribute and make a difference during those same travels will create a lasting memory that will most likely shape your outlook and positively impact your career development.

Purpose of Teaching Beyond Borders Program

The foundational belief of Teaching Beyond Borders is that education is the most powerful force we can use to change our world. This belief drives us in the Teaching Beyond Borders (TBB) program to diligently work to increase access to a quality education for all children, especially those children who live in impoverished regions of the world like Nicaragua.

Nicaragua is among the poorest countries in the Americas. According to the United Nations Development Programme, 48% of the population of Nicaragua live below the poverty line making less than the equivalent of \$1,830 USD per year. Approximately 80% of the population live with less than \$2 per day. According to UN figures, 80% of the indigenous people (who make up 5% of the population) live on less than \$1 per day.

TBB seeks to change these trends by collaborating with community members in Salinas. An effective program must be holistic in its approach if we are to make a difference in the lives of children, promote education, and further community development. Sometimes our efforts may be focused on supporting and training teachers, teaching English, teaching health and hygiene, creating community gardens, supplying safe water, or offering micro-enterprise opportunities to willing workers. In most cases our efforts go beyond working in the classrooms and schools.

The Values of Teaching Beyond Borders Program

To carry out its mission the Teaching Beyond Borders program has established the following values:

- Empower people through education
- Create sustainable cross-cultural connections
- Promote and strengthen community development
- Provide increased access to a quality education
- Embrace diversity and emphasize all students can learn
- Promote literacy for the whole community
- Embrace excellence and foster innovation

In our work to serve those who live in impoverished regions around the world, we subscribe to the following oath created by Robert Lupton:

The Oath for Compassionate Service

- Never do for the poor what they have (or could have) the capacity to do for themselves.
- Limit one-way giving to emergency situations.
- Strive to empower the poor through education, employment, lending, and investing, using grants sparingly to reinforce achievements.
- Subordinate self-interests to the needs of those being served.
- Listen closely to those you seek to help, especially to what is not being said – unspoken feelings may contain essential clues to effective service.
- Above all, do no harm.

EDG 2770 Exploring Global Education Issues in International Context - Course Explanation

EDG 2770 Exploring Global Education Issues in International Context is a Summer A term course open to all DSC students. This course is a guided field experience designed to immerse students in global issues challenging the educational community worldwide, from both academic and experiential perspectives. Through guided studies and field experiences within Nicaragua, students will gain a greater appreciation of the challenges faced by emerging nations that include the effects of poverty, exceptionality, race, ethnicity, language and gender on access to quality education and equitable life chances.

The 3-credit course can be repeated for credit and will help satisfy the graduation elective requirements of the Associate of Arts (AA) degree. Students will be required to complete a final multi-media project, which communicates their learning experiences and the conclusion of the needs assessment conducted in the field, and present their completed projects at a symposium event.

Attendance Policy - DSC students will spend the first four weeks of the SAP in the classroom at Daytona State College working in small groups to design projects to meet the needs identified by the community. Therefore, **course attendance is mandatory**. In cases of emergency or illness, students are allowed to miss one class. **If a student misses more than one class, then they are not eligible to go on the SAP trip.**

Accommodations based on double, triple or quadruple occupancy. Equilibrio offers guest casitas: each within its own private area of the farm complete with fruit trees, wildlife, and paths leading to a secluded gazebo, outdoor desks, hammocks, and easels. Guest's casitas feature a large bedroom with thatched-palm ceiling, two queen-sized beds (or more), 180-degree open-air views, reading loft, walk-through closet, and indoor bathroom leading to your private outdoor garden shower. The casitas are scrupulously screened-in to keep insects out; yet, since the screens are virtually invisible, guests appreciate an unobstructed connection with the outside environment. Exceptional ventilation combined with the shade of surrounding trees keeps the casitas fresh throughout the day and night. Tropical breezes blow most of the year and all casitas have multiple fans. Casitas include solar hot-water showers, two large safe boxes, standard flush toilets, and standard electrical outlets (120 v as in USA). Purified water is also available in your casita.

You will have three delicious, healthy meals each day. Breakfasts and Dinners are served at The Riverside Lounge. This structure is nestled in nature, next to the salt-water river. It is the perfect place to read in a hammock, relax, study, take in a performance, watch a movie on the big screen, or have a music jam session. Lunches will be served at a local family site close to your project work in the community.

Health Information

There are no specific immunization requirements for entry into Nicaragua. Of course, there are basic immunizations that every traveler should have, including tetanus, measles, mumps, rubella and polio.

There have been no reported outbreaks of Zika or malaria in the Rivas region, located in southern Nicaragua. **But please note:** Zika outbreaks have been reported in some northern

regions of Nicaragua. Because of the risk of birth defects in babies born to women who were infected with Zika while pregnant, women who are pregnant should not travel to Nicaragua. For more information, see [Zika Virus in Nicaragua](#). We recommend that you bring a bodily insect repellent containing DEET (diethylmethylnolamide), in 30%–35% strength for adults (or 6%–10% for people with sensitive skin) and sunscreen.

The **National Center for Infectious Diseases** offers excellent advice regarding travelers' health. Please visit the CDC website: <http://wwwnc.cdc.gov/travel> to find information relevant to travel in Nicaragua. Select "For Travelers," scroll to find "Nicaragua," select "Extended Stay / Study Abroad," and then click "Go."

To be prepared for the health risks in Nicaragua, we formally ask that you make a visit to your medical doctor and inform him/her of your travel plans and discuss recommended precautions. Inform him/her that you will be staying in a mainly rural area in southern Nicaragua. You will not be handling livestock.

Complete the program application on the following pages, print, sign and deliver to Dr. May (200/308) by the deadline above.

Yoga Equilibrio).

I certify that I fully understand and agree with all of the above information, and that I am solely responsible for my health, safety and well-being while participating in all the activities and during my whole stay at Equilibrio Yoga Art Nature Retreat (Retiro de Arte y Yoga Equilibrio).
