

# Embedded Specialist

We can work with you to provide the support that your students need to have a successful semester.

## Benefits that Specialists provide:

- Support to students via **one-on-one virtual consultations**.
- Communication with students via **discussion boards and email**.
- Development of **supplemental resources** (video/handouts) to aid learning.
- Creation of personalized virtual **workshops** by request.

## Faculty & Specialist Collaboration

We understand that, as an instructor, it is difficult to be available to each and every student in your class. By embedding a specialist, you can encourage students to contact the specialist if/when they are struggling with an assignment or in the course in general. Once embedded in the course, the specialist can access assignment sheets, the course syllabus and other documents necessary to be aware of the expectations of the course.

## Specialist Involvement:

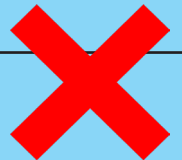

### What we can do:

- Post announcements.
- Post learning resources.
- Discuss individual plans for students.
- Explain and clarify course materials.

### What we won't do:

- Edit student work.
- Speculate/comment on student grades.
- Teach students coursework.

*\*Any kind of specialist involvement will be discussed and agreed upon with the faculty member beforehand.*
