

Save money with **generic** medications.

SAVE MONEY NOW

If your doctor says that a generic will work for you, give it a try. We'll even waive the pharmacy copay for your first covered generic prescription when you switch from a brand-name medication. Simply take the new prescription from your doctor to the pharmacist and the copay will be waived. Only your doctor should determine what the appropriate medication is for you.

SAVE MONEY LATER

Did you know that generics are always priced at the lowest copay level? You can save up to \$420* a year (per drug) or \$15-\$35 a month by switching and then using a generic all year long.

For more information about generic drugs visit the Generic Pharmaceutical Association website at www.gphaonline.org/about-gpha/about-generics/faq

In the pursuit of health®

*Your savings could be higher or lower depending on the specific drugs you switched from, your pharmacy plan's coverage, how often you refill your prescription, and where you purchase your prescriptions. If you have a pharmacy deductible this applies only if you have met your deductible requirement. Only your doctor should determine the appropriate medication for you. Florida Blue is a trade name of Blue Cross and Blue Shield of Florida Inc., an Independent Licensee of the Blue Cross and Blue Shield Association.
