WHAT YOU SHOULD KNOW ABOUT

What's a provider network?

A provider network is a list of the doctors, other health care providers, and facilities that are contracted to participate in a FHCP network. These providers are called "network providers." A provider not contracted to participate in a FHCP network is called an "out-of-network provider."

How can I see if my doctor is in a FHCP network before I call?

First, make a list of all the providers you use. Remember that "primary care providers" are the doctors you see first for most health problems. They are usually the ones who refer you to specialists.

Quickly find a provider, pharmacy, or clinic, hospital or other facility.
