Lung Cancer Screening and Counseling	Ages 50-80; 20 pack smoker history, current smoker/quit within past 15 years
Prostate Cancer Screening	Discuss with your doctor
Skin Cancer Screening	Discuss with your doctor

Live a Healthy Lifestyle

- Get your annual wellness exam to review your overall health and keep follow-up visits with your doctor.
- Find out if you are at risk for health conditions such as diabetes, high cholesterol and high blood pressure.
- Get your vaccines, preventive screenings and labs.
- Human Papillomavirus (HPV) vaccine 3 dose series is recommended for men and women ages 19 through 26 years if not previously vaccinated prior to age 13.
- Talk with your doctor about the medications and over-the-counter/vitamins you are taking to reduce side effects and interactions.
- Get a Flu Vaccine every year to prevent illness and related hospitalizations.
- Get a COVID-19 vaccine to prevent severe illness and related hospitalizations. Immunocompromised people should consult their physician on the need for an additional mRNA vaccine dose.

Are your children up-to-date with vaccinations?

Getting the recommended sequence of vaccinations is always a good idea to protect your child from illnesses from birth to 18 years of age. Most of these vaccinations require additional doses or boosters over time. As children grow up to become teenagers, they may come in contact with different diseases. Here are vaccines that can help protect your preteen or teen from these other illnesses and infections:

Tdap Vaccine

Age 11 or 12. Protects against tetanus (lock jaw), diphtheria and acellular pertussis (whooping cough). This is a booster shot of the same vaccine given during early childhood.

Meningococcal Vaccine

(MCV4) Two doses beginning at 11 or 12 years, with a booster dose at age 16. (MenB) Two doses beginning at ages 16-18. Protects against meningitis, sepsis (a blood infection) and other meningococcal diseases. Children with higher risk factors may need additional doses.

2022 General Wellness Guidelines:

To discuss with your Health Care Provider

Immunizations*	Birth	1 month	2 months	4 months	6 months	12 months	15 months	18 months	24 months	4 - 6 years	11 - 12 years	13 - 14 years	15 years	16 - 18 years
Hepatitis A						2 dose series, 12-23 months								
Hepatitis B	1st dose	2nd dose			3rd dose									
Diphtheria, Tetanus, Pertussis (DTaP)			1st dose	2nd dose	3rd dose		4th dose		5th dose					
Tetanus, Diphtheria, Pertussis (Tdap)										1st dose				
Haemophilus Influenzae Type b (Hib)			1st dose	2nd dose	3rd or 4th dose**									
Inactivated Poliovirus			1st dose	2nd dose	3rd dose				4th dose					
Measles, Mumps, Rubella (MMR)***						1st dose			2nd dose					
Varicela						1st dose			2nd dose					
Pneumococcal PCV13 and PPSV23			1st dose	2nd dose	3rd dose	4th dose								
Flu (Influenza)					6 months through 8 years 1 or 2 doses; 9 years and older 1 dose only									
Rotavirus			1st dose	2nd dose	3rd dose**									
Meningococcal											1st dose			booster
Human Papillomavirus (HPV)											3 dose series			
Covid 19											12 and older per CDC guidelines for specific vaccine			

Human Papillomavirus

(HPV) Vaccine two or three doses over six months, beginning at ages 11–12. (Two doses if started before 15th birthday or three if started on or after 15). Protects boys and girls against HPV, which can lead to cancers and genital warts.

Flu Vaccine

Every year after six months of age. Protects individuals from getting the influenza virus.

COVID-19 Vaccine

The American Academy of Pediatrics (AAP) recommends the COVID-19 vaccination for all children and adolescents 12 years of age and older who do not have contraindications using a COVID-19 vaccine authorized for use for their age. Any authorized COVID-19 vaccine appropriate by age and health status can be used for COVID-19 vaccination in children and adolescents.

Keep your teens safe from preventable, painful and life-threatening diseases by staying in touch with your pediatrician's office or health clinic. Be sure to verify your benefits for preventive services.

Florida Blue is an Independent Licensee of the Blue Cross and Blue Shield Association.

* These are routine immunizations based upon cdc.gov recommendations. Range of recommended ages for catch-up or certain high-risk groups is at the doctor's discretion based on the member's family history and personal risk factors.

** Dosages determined by doctor with the type of brand vaccine used.

*** Those in an outbreak area, aged ≥ 12 months who previously received ≤ 2 doses should receive a dose of mumps-virus containing vaccine.
