This specialized course is for investigators, patrol officers, crime scene
investigators who are responsible for the location, development, and
documentation of fingerprint evidence. The methods taught in this course are
widely used within the forensic community and are meant to build upon the basic
understanding of fingerprint development by teaching additional methods and
procedures. Also featured in this class is the development of post-mortem
fingerprints utilizing decomposed human ridge skin. Those attending the class
will be required to handle and manipulate the remains through practical
exercises. Students will take a written exam and must achieve 80% or better to
pass.

Topics covered include:

- History and evolution of fingerprints in a forensic setting
- Fingerprint terminology
- Physical methods of advanced fingerprint processing for various materials
- Photographic documentation and preservation of fingerprint evidence
- Admission of fingerprint evidence in court
- Development and recovery of post-mortem fingerprints

About the lead instructor:
Investigator Josh Mott is an experienced instructor and agency crime scene
investigator. He has over 2,000 hours of specialized training and has lectured at
the University of Tennessee Forensic Anthropology Center in the field of post-
mortem fingerprint development.
